Technical drawing of a semi-circular object. The top half is a semi-circle, and the bottom half is a flat surface. A chamfer of size $0,2 \times 45^\circ$ is indicated on the bottom edge. The left half of the semi-circle is shaded with diagonal lines.

A diagram showing a quarter-circle sector of a circle with radius 2. The sector is defined by a horizontal radius, a vertical radius, and a 90-degree arc. A line segment is drawn from the center of the circle to the arc, making a 20-degree angle with the vertical radius. The area between this line segment and the arc is shaded with diagonal lines. The distance from the horizontal radius to the line segment is labeled 1.5. The angle between the horizontal radius and the line segment is labeled 45 degrees.
